Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 21 November 2003 has been entered.

Election/Restrictions

2. Claims 10-12 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-4, 7-9, 13 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Marx et al (USP 6,230,717). The patent to Marx discloses a disposable

Art Unit: 1744

(claim 14) (see title and abstract, line 1) toothbrush (10) as well as a power system (21,22+fig 13) which includes a non-rechargeable battery (22) (claim 2) which would have a predetermined life (see column 6, lines 10-23). The functional or otherwise narrative language in the claims (i.e. the terms "trial" or "less than normal") fail to define over the structure of the prior art. Also, the reference to a particular number of brushings refers to a variable quantity (this is really not indicative of time in that one could use the brush once a day, every other day, etc). With regard to the addition of the "means preventing" recitation now in claims 1,7 and 13, one of the disclosed embodiments for practicing the present invention is to merely use a non-rechargeable battery which would have a certain life such that the brush could not be used after the battery has lost its charge. This structure is found in the patent to Marx.

5. Claims 1-4,7-9,13 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Montanio (USP 4,179,814). The patent to Montanio discloses a powered (motor 14) tooth cleaning device including a power system including non-rechargeable batteries (20) (see column 3, lines 7-9) which would have a predetermined life. Also see the above comments. The term "disposable" (claim 14) does not define over the prior art.

Allowable Subject Matter

6. Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim *and any intervening claims*.

Response to Arguments

7. Applicant's arguments filed 21 November 2003 have been fully considered but they are not persuasive. The examiner does not dispute applicant's description of the present invention; however, the structure which is recited in the claim(s) must define the invention over the prior art. References or comparisons to some other device which to which the presently claimed device is compared does not define over the structure of the prior art. The addition of the "approximately sixty brushings" is noted; however, this does not structurally limit the claim(s) in that this is a variable quantity. One of the ways of practicing the present invention (and which would be encompassed by the phrase "preventing means") involves the use of a non-rechargeable battery such that the brush would not be usable after the charge thereof has depleted. This structure is met by the prior art.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Spisich whose telephone number is (571) 272-1278. The examiner can normally be reached on M-Th (6-3:30), Alternate Fri off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert J Warden can be reached on (571) 272-1281. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
